Some Owego kids put a new twist on regular pizza, and they did it for the sake of math. As NewsChannel 34's Samantha Hen the 2nd graders got a tasty lesson in measuring.

2nd graders in Mrs. Peacock's class at Owego Elementary got their hands messy all in the name of math by making apple piz:

Teacher Suzanne Peacock says, "We're starting our measuring unit and we had the students look at fraction... $1/2, 1/4, 1/3$ for c measuring. We're also currently studying venn diagrams which are a really hard concept for most 2nd graders to learn. We've using hula hoops so today we venn diagramed the difference between pepperoni pizza and apple pizza."

And as part of their social studies lessons the students learned about Johnny Appleseed. To tie in the math, science and socie lessons the kids got to make the tasty treat.

Luke Kiballa says, "For the apple pizza there was cinnamon, brown sugar, sugar, and apples."

Under adult supervision, the students measured the ingredients, mixed the dough, and assembled the pizzas. Sarah McKinne

Sarah McKinney says, "Putting on the brown sugar."

The students each got a copy of the recipe so they could try making it at home
