

Owego Apalachin Central School District

Notice Concerning Our Receipt of Public Health Insurance Funds And Your Related Rights.

We are required to provide you with an annual reminder of your rights related to this District's receipt of funds through the State Medicaid program. This money, received through the New York State Department of Health, helps support services provided to all children.

To receive this funding, we are required by New York State and the federal government to file claims with the state Medicaid program for some of the health care service we provide our students. This includes services such as nursing, physical therapy, occupational therapy, psychological counseling, and speech therapy. The information is provided electronically through processes prescribed by the federal and State governments. It contains information like service code, date of service, and duration. No information is provided without the voluntary consent of the student's parent or guardian and they can withdraw their consent at any time.

Regardless of whether or not the public insurance program pays for these services, or whether or not the parent allows us to bill, these services are provided free of charge to the parents for as long as the student needs them.

Should you have any questions, wish to consent to our seeking this funding, or wish to withdraw consent you have already granted, please contact:
